SEGMENT 8 mm

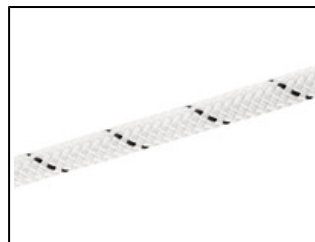

SEGMENT is an 8 mm low stretch cord for expert caving activities. Compact and lightweight, it is easy to store in a pack. EverFlex treatment allows it to maintain flexibility over time. The texture of the sheath provides good grip during descents. Comes in 200-meter length.

Compact, with textured sheath that offers good grip on both descents and ascents.

EverFlex treatment maintains the cord's flexibility and makes it easy to store.

Excellent strength-to-weight ratio, due to its specific construction.

Short Description Compact and lightweight, low stretch cord designed for cave exploration

- Selling Points
- Compact cord with good grip:
 - Compact and lightweight to help limit bulk during long explorations
 - Thick, textured sheath offers good grip
 - Excellent balance of low stretch and elasticity for efficient ascents
 - Compatible with SIMPLE and STOP caving descenders, with CROLL and BASIC ascenders (1)
 - Remains flexible over time:
 - EverFlex treatment: special treatment and weave improve the rope's consistency; offers excellent grip and consistent handling over time
 - Easy to store in the pack, because the cord does not stiffen
 - Flexible cord makes it easier to tie and untie knots
 - Excellent strength-to-weight ratio:
 - Lightweight (43 g/m)
 - Specific construction with polyester sheath and nylon core offer great durability for its diameter

(1) Details about compatibility and possible uses for this cord can be found in technical tips at www.petzl.com.
